### General product description

- Rubber skin protection for improving the drop-vulnerability of the handset;
- Specifically designed to securely hold and protect the handset from general wear and tear and harsher environments;
- Does not interfere with the transmission range of the phone;
- Does not change the acoustic characteristics;
- Will not invalidate any warranties implied;
- Usable with belt clip;
- Great value add proposition;
- Increased customer satisfaction.

### General material description

- Offers good mechanical properties under a wide range of operating temperatures;
- Highly durable;
- Resistant to fatigue, ozone, ultraviolet, acids, alkalis, water, most oils and lubricants.

### Shape fatigue (in relation that handset needs to be taken out of cover for charging)

- The rubber has excellent dynamic memory retention properties and very good resistance to tension and compression;
- Consistent, proven performance far beyond that of any other thermoplastic material.

### Size & weight

- Length 5¾" ( 145mm )
- Width 2" ( 50mm )
- Depth 1¼" ( 32mm )
- Weight 1.8 oz ( 52grams )

### Recommended drop height survival

- Successful drop test to a height of 3 m (10 ft) onto solid concrete  
- no damage on phone, phone remains in the holder.

### Environmental friendly

- Fully RoHS compliant and fully recyclable.
